THE NEXT CHAPTER

An LHT Riddle Comic

Inspired by @getlht

CasinoCoin closed one book. A new one opened on the XRP Ledger...

Old coin for new coin. No rush. No deadline.

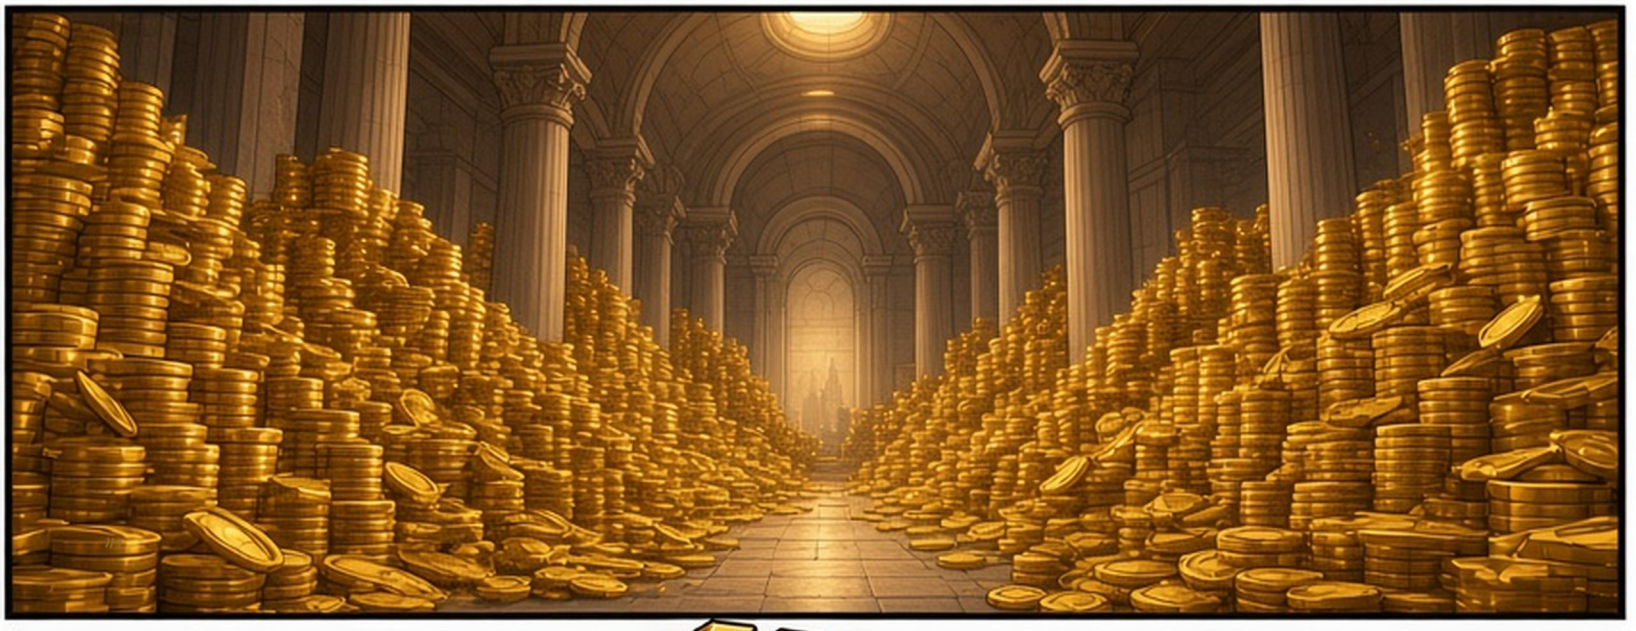

RIDDLE

Holders of the old coin can swap, with no deadline, at a perfect even rate. What is the official exchange?

When LHT was issued, the supply was fixed for good.

Not a crowd that only watches.

RIDDLE

LHT exists to turn Web3 communities from passive audiences into something better. What does it want them to become?

A new mascot stepped onto the ledger and told everyone to say hello.

RIDDLE

A gold-rimmed coin with a thumbs-up arrived and told everyone to say hello. What is the mascot's name?

LuckyHash games don't hide the roll.

RIDDLE

LuckyHash games are transparent and provably fair. What on the XRP Ledger makes every outcome verifiable?

ANSWER KEY

1. LHT (LuckyHash Token) — CasinoCoin's next chapter on the XRP Ledger.
2. 1 CSC = 1 LHT — the official migration rate, with no deadline.
3. 100 billion LHT — a fixed supply, stamped once when LHT was issued.
4. Active participants — LHT exists to turn passive audiences into these.
5. Hash Defender — the official mascot who arrived and said hello.
6. Hashes — LuckyHash games use XRP Ledger hashes, so outcomes are hash-verifiable.

This comic is new fiction inspired by posts from @getlht and the public $LHT site, lhtoken.io. It is not official canon.

Five secret numbers are hidden in the art. Look closely for 123321, 589, 119, 22, and 13.
